BOOT CAMP

BOOT CAMP 2019

BOOTSTRAP YOUR CAREER

OBJECT

The Boot Camp is a disruptive recruitment program designed by EURA NOVA that gives you the opportunity to start your career with **3 months of intensive training** in our core expertise, i.e. artificial intelligence, architecture, and development.

Do you know exactly what role you want to play on the big data stage? Maybe not. That's where our Boot Camp can help. EURA NOVA gives fresh graduates the opportunity to begin their career with customized training, coached by international experts.

3 months - 3 use cases - 3 datasets. Each month, you will work with young as well as with experienced data scientists to deliver a project featuring machine learning, optimisation, data-driven architecture, graphs, and other artificial intelligence trends. You will test yourself at different roles, learn how to interact with clients, give your best to make your team reach its goals. The 3 projects are carefully chosen for you to get your hands dirty: the proofs of concept you will work on will have a direct and concrete impact on our clients.

You will be coached by the EURA NOVA crew, including the R&D team and the founders, to help you enhance your tech skills and your soft skills. From day one, you will be part of the EURA NOVA family and you will work in the friendly, intellectually stimulating, and highly-committed team at the HQ.

At the end of the 3-month coaching period, you will have a better idea of what role you want to play as a data expert and you will be **ready to jump on a project**.

Possible roles to take on: researcher, data scientist, data engineer, project leader, frontend/backend developer, project facilitator/coordinator,...

Former Boot Camp projects: Anomaly Detection in Manufacturing Industry, Data Visualization in Transport Industry, Ranking methods in Pharmaceutical Industry, User Habit Detection in Automotive sector, Natural Language Processing for mail tagging, Recommendation engine for a media company and warehouse optimisation for a well-known retailer

PROFILE

The Boot Camp is for **people who love solving problems and making a difference with data magic**. At EURA NOVA, we believe you can learn anything with the right attitude. If you are curious and want to learn more, if you are a bright thinker and want to shake up your ideas, if you are a team player and want to do elegant work, start by challenging your limits and join us.

If you are passionate about artificial intelligence and have a strong basic knowledge in IT & applied mathematics, take the opportunity to become an expert in a short time with EURA NOVA and apply.

RECRUITMENT PROCESS

To apply for the Boot Camp, send an email to career@euranova.eu. Your email should contain your latest CV and your motivation for joining us.

Your cover letter should mention:
- why you want to attend the Boot Camp,
- one of your projects that you are proud of and that is linked to data or AI

Once we receive your application, we will plan a short phone call. All going well, we will then plan a face-to-face meeting at our premises.
